## SOBRE

With more than 3 years as a software developer using (Angular, Node, TypeScript, Nest, Expo...etc), in addition to working with libraries such as React and Bootstrap.

## PROFESSIONAL EXPERIENCE

Software Developer - IMOVEISTOCK - 06/2023 | 11/2023

[www.imoveistock.com.br/](https://www.imoveistock.com.br/)

- I participated as a full stack in the creation of the property sales website using...(Angular, Nest, MongoDB and SASS).
- Front-end in Android and iOS application development like "doormen in charge" and "imoveistock", using: (React-Native, Typescript, AWS and UI Material).
- Addition of a backoffice environment for the administration of advertisers with a period of 3 months using... (Angular, Nest, AWS, Bootstrap and Node)

Front-end Angular - TGT Digital - 06/2022 | 07/2023

[www.tgtdigital.io/](https://www.tgtdigital.io/)

- Contributes to GraphQL integration using Angular in TS.
- Developed iONIC apps with Angular using firebase as an alternative backend.
- Solved problems with RESTful APIs by switching to WebSocket for more instantaneous response.
- I was responsible for reviewing and testing PRs in the creation of an expo react-native app in tsx for a travel agency.

Front-end VTEX - My Eshop - 11/2021 | 05/2022

[www.myeshop.com.br/](https://www.myeshop.com.br/)

- Creation, manipulation, customization and automation of website landing pages and web applications with VTEX, HTML, Sass, JS and JQuery.
